

## Keystone Jack RJ45, Cat.6A

P/N: **KEJ-CEA-S-10G** 

Strip the cable for minimum 75mm, pull the foil or braided shield back over the jacket an wrap the drain wire around the shield.

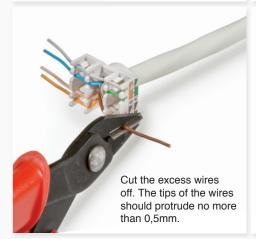

NOTES: IDC is suitable for 22-26 AWG wires.

Insert the wires into the cap through the holes.

Lay the wires to their correct positions based on the color code (T568A/T568B)

Close the jaw until it clicks into place.

The drain wire should wrapped around the cable to ensure 360° shielded. Push the shielding lug close to the jack.

Fix the cable tie to the shielding lug.
